HARICHARAN PULUGURTA

White Plains, NY | H: 419-450-1795 | charanp@gmail.com
https://github.com/harip | https://harip.github.io/site/pythonds

Summary

- **Azure** Experience using Azure Functions (C#, Python), Logic Apps, Flows, ADF (V1 and V2), App Services, CosmosDB, DevOps automation using PowerShell, VSTS pipelines, Azure templates.
- Extensive **AWS** Cloud experience, Re-Architect and migrate legacy systems to AWS Implement Serverless architecture using Containers, AWS ECS, Lambda/Step functions, DevOps automation using AWS SDK. IOT development experience using IBM OpenWhisk and Raspberry pi. Experience in application development using Azure Web Apps and Functions. Experience in Salesforce Development.
- Web development using Angular 6, 5, TypeScript/JavaScript, HTML5, CSS. Front end unit testing experience using Karma, Jasmine and Jest.
- Software development using .NET, .NET Core, NodeJs, Go, SQL/NoSQL Databases. Familiarity with Data science experience using Python (Pandas, Petl, PySpark), Apache Spark
- Expertise in developing Geographical Information Systems Applications (GIS) using ArcGIS Server Suite, ArcObjects, MapObjects, ArcGIS API for Silverlight, Spatial SQL Server 2008.
- Database programming using Mongo Shell, SQL, T-SQL, Stored Procedures.
- Received multiple performance related awards at Swiss Re.
- MongoDB for DBA's and SAS Certified Base Programmer. Publications and conference proceedings.

Summary of Skills

Programming and Development Tools:	.NET/.NET Core, Angular 6/5, RxJs, NgRx, TypeScripy/JavaScript, Python, Pandas, Go, Docker, SQL/TSQL, XAML, HTML, CSS, VBA, MongoDB, SQL Server, SQL Server Reporting Services, Mongo C# Driver, nHibernate, Entity Framework, Windows Workflow Foundation, WCF, WCF RIA Services, LinqToSQL, Domain Services, ADO.NET, ADO, DAO, Lucene.net, Knockout, CoffeeScript, DevExpress, Telerik, SonyVegas, Couchbase, Visual Studio 2012/2010/2008/6, Git, SVN, nHibernate Profiler, SQL Profiler, dotTrace, Luke, WebStorm, MongoVUE, Robomongo, LinqPad, NewRelic, Resharper, Raspberry Pi
Cloud	*Azure* – App Services, Functions, Logic Apps, Web Apps, CosmosDB, VSTS.
	AWS – CloudFormation, SES, SNS, S3, AWS Powershell CLI, DynamoDB Streams, Elastic Container Service, Lambda/Step Functions, Glue, CloudWatch, API Gateway, Powershell CLI, RDS, Apache Spark
	IBM – OpenWhisk/Cloud Functions, MQTT and IOT
GIS:	ArcGIS Server 10, ArcGIS Desktop 10, ArcSDE 10, WebADF, ArcObjects, Python Scripting for ArcGIS, MapObjects, ARCGIS API for Silverlight, Bing Maps
Database:	MongoDB, SQL Server 2017, DynamoDB, PostgreSQL
Statistics:	SAS, R, SPSS, MINITAB, MATLAB

Experience

06/2018 - Current
Armonk, NY

Senior Software Developer
SWISS RE

Lead and develop a B2B2C insurance platform for customers to buy life insurance products and for Agents

to sell and assist insurance products to customers. Manage offshore developer team in resolving technical issues, perform code reviews, ensure code quality and adequate code coverage and regular lead the daily scrum calls. Design and develop ETL processes on **Azure** platform for data migration from third party vendors source files to data warehouse. Assist in evaluating and implementing data ETL tools on Azure.

Lead Developer – Front End

- Lead a team of developers (on shore and off shore) in creating a web portal for customers to buy insurance products and agents to assist customers and sell insurance products.
- Worked with Software Architect and Senior Developer to design a B2B2C web platform and identify suitable tech stack to develop the web platform.
- Worked closely with UX designer, backend developers and decision management and modeling analysts and business analysts to create page flow diagrams, technical and API documentation and give high level estimates.
- Created Angular Custom Library for creating reusable components.
- Hands on experience using Angular Http Interceptors, Lazy Loading Feature Modules, Observables and RxJs library, NgRx library for state management and Custom Validators in developing the portal.
- Integrated with Google Analytics and Azure Application Insights for page tracking and performance.
- Created unit test suite using Jest testing framework and integrated with Azure build pipelines for executing and generating test results and code coverage reports and ensured the team maintained an approved code coverage.
- Created several in-house apps, proof-of-concept apps using frameworks/languages such as Angular 6, C#, and Python.
- Lead the daily stand up calls regularly.

Data Engineer

- Lead a team of 3 including data scientist and DevOps engineer in identifying a tool for secure data access for business users with various roles.
- Created Azure Functions using Python 3.x and C# to migrate data from SFTP location, ADLS to SQL data warehouse.
- Created Azure Logic Apps by integrating out-of-box Azure Services and custom Azure Functions (C#) for data processing and automating report generation and publication via email to internal business users.
- Created ETL processes using Azure Data Factory (ADF) V1 and V2 by integrating out-of-box Azure services and custom C# code.
- Worked with data scientist to create Azure Functions and Azure web apps using Python 3.x for data analysis and processing.
- Extensive use of PowerShell and Python scripts for automating several data processing related tasks.

10/2011 – 06/2018
Brooklyn, NY

Senior Software Developer, DevOps
THE NEW TEACHER PROJECT

Design/Architect and develop systems using latest technologies or services (**AWS and Azure**) in an Agile environment. Work on complex features (larger stories) and provide support for team members. Follow coding standards and best practices. Automate AWS infrastructure (developer, QA/Staging and production environments) using Docker, Lambda, CloudFormation and PowerShell.

Development

- Design and develop Applicant Tracking System TeacherTrack2 using .NET Framework deployed on AWS. The system is used by new/veteran teachers applying for new positions and by district staff for recruitment and by principals/coaches/evaluators for teacher evaluation.
- Design and develop teacher observation tool Argus using JavaScript and Node.js and deployed on AWS. The system is used by coaches and evaluators for teacher evaluation.
- Design and develop web based reporting system INRS using .NET Framework deployed on AWS. The system is used by district staff, principals to generate reports based on district/school/teacher level performance data.
- Designed and developed a ETL system to create a SQL Server data warehouse using AWS Step Functions, AWS Lambda, DynamoDB and Python (Petl).
- Designed and developed various Salesforce Integrations and Lightning components.
- Web development using HTML, CSS, JavaScript (ES6) frameworks such as Angular, Knockout and ASP.NET (Webforms/MVC).

- Backend development using languages C#, Node.js, Python and Go with databases SQL Server, MongoDB, PostgreSQL, DynamoDB and AWS RDS.
- Implement Serverless architecture by converting monolith services written in WCF to AWS microservices using Lambda/Step functions, S3, SES, DynamoDB Streams. Lambda/Step functions are created using .NET Core, Python and Go.
- Data analysis using Python (Pandas library).
- Design and develop microservices for Salesforce and Blackboard integration using AWS Lambda functions (.NET Core).
- Developed custom Salesforce API endpoints using APEX Classes, Triggers, Salesforce BulkAPI.
- Created a CI/CD pipeline using AWS CloudFormation, Lambda, S3 and PowerShell scripting.
- Test-driven development using MbUnit, Galelio, Selenium, qUnit and Jasmine.
- Database programming using SQL Server, nHibernate, Entity Framework, Stored Procedures, Views.
- Use of Lucene.net for indexing data and Couchbase server for caching.
- Extensive use of performance tools such as nHibernate profiler, SQL profiler, dotTrace, NewRelic for improving performance of website in terms of faster load times.

Operations
- Helped in setting up beta and production environments.
- Provide 24x7 production support which includes addressing infrastructure as well as application alerts.
- Automate AWS infrastructure for CI-CD pipeline.
- Extensive use of AWS Powershell CLI for data backups, moving data between different instances and copying data from production instances to staging and dev instances.
- Setup monitoring, logging using CloudWatch
- Deployed a 3-member MongoDB replica set.
- Data center migration – Cologaurd to AWS
- Data center migration – Rackspace to Cologaurd
- Setup Monitoring using Alchemy Eye.

04/2011 - 10/2011 Brooklyn, NY	**Software Developer** **WINDANALYTICS.COM**

WindAnalytics.com
- Designed a web application using n-Tier architecture for wind turbine installer/property owner to analyze whether a property is cost effective for wind turbine installation using ASP.NET MVC3, **C# 4.0**, **WCF, Silverlight 4.0**, SQL Server 2008, ArcGIS Server 10.0 and ESRI Silverlight API.
- Developed **authentication** module using **ASP.NET MVC3** with features such as CAPTCHA.
- Integrated with **Zoho CRM** (Zoho API) for forwarding the customer details to the CRM database.
- Integrated with **PayPal** for payment processing.
- Created ArcGIS cached service to create a wind class map for USA using NREL data that shows the average wind pattern. Created geoprocessing services to determine the wind class for missing areas based on nearest spatial search using Python.
- Extensive use of **Linq**, **LinqToSQL**, Entity framework and stored procedures for **SQL Server** CRUD operations and use of **Domain Services** consumed by the Silverlight.
- Coding standards and practices based on **MVVM** (Silverlight), MVC3, CodeRush Xpress and **unit testing**.

Meteorological Data Checker/Met Station Checker
- Developed a web application using n-Tier architecture for wind analyst to process met station data for wind analysis. The application was developed using **ASP.NET MVC3, C#4, WCF RIA, Silverlight 4**, SQL Server 2008, ArcGIS Server 10.0 and ESRI Silverlight API.
- Created an **ArcGIS dynamic service** using **ArcGIS Server** that returns data (over 20,000 met stations) from SQL Server as dynamic tiles/images that change as the data changes.
- The application allows an analyst to select an area of interest on the map to retrieve all the met stations in the area (using WCF RIA, Domain Services, LinqToSql and SQL stored procedure). The analyst selects a station to further process the data.
- Extensive use of Linq, LinqToSQL and Entity framework for **SQL Server** CRUD operations.
- Coding standards and practices **MVVM** (Silverlight), MVC3 (ASP.NET), StyleCop and **unit testing**.

07/2010 to 04/2011 Burlington, MA	**Software Developer** **FOLIAGE SOFTWARE SYSTEMS**

September 2010 – April 2010 – VOLPE, Boston, MA
- Developed a web application for FAA/NPS personnel to download/view/add/modify GIS data using ASP.NET 4.0, **C# 4.0**, **Silverlight 4.0**, **SQL Server 2008**, **ArcGIS Server 10.0**, ArcSDE, ArcGIS API for Silverlight in an AGILE software development process.
- Silverlight **Telerik** Rad Controls for displaying data (tabular and graphical).
- Created Web Services to automatically download GIS data (USGS Seamless server) on the server and import it to the ArcSDE database.
- Created REST based geoprocessing services using ArcGIS Server, Python and **ArcObjects** to send large amounts of GIS data as images.
- Extended the ArcGIS API for Silverlight for building complex user specific GIS tools that utilized the geoprocessing services/third party web services to analyze the GIS data.
- Coding standards and practices based on **MVVM pattern**, styling using StyleCop and unit testing using MSTest.

July 2010 – September 2010 - VOLPE, Boston, MA
- Developed a prototype web based geographical information system for FAA using **ASP.NET, C#, ArcGIS Server 9.3**, ArcSDE 9.3, ArcGIS **WebADF** in an AGILE process.
- The web based GIS application had features such as connecting to ArcSDE, editing features (adding, deleting and changing geometry).
- Developed custom GIS web controls that extended WebADF controls using C#.
- Conversion of WEB ADF based application to **Silverlight** version.

12/2007 to 07/2010 Chicago, IL	**Software Developer** **INFRASTRUCTURE MANAGEMENT SERVICES, INC**

- Developed a data collection application using **C#, DevExpress, SQL Server** that interfaced deflection measurement instrument with a GPS instrument using serial port communication.
- Developed a web-based PMIS that integrated pavement condition data (Data, Images and Videos) with GIS maps using **.NET Framework**, Bing Maps and SQL Server.
- Developed an online data collection/validation Silverlight application for field crew/office personnel. Field crews upload data online as data are collected which is then evaluated by office personnel.
- Developed various kinds of 3D data visualization techniques using ArcGIS, KML/Google Earth, **Silverlight 3**, Bing Maps and field surveying data.
- Developed a QA software analysis tool using **C# Winforms**, **WPF** and SQL Server to QA the data. The statistical models in the system help to identify and correct the data quality issues.
- Developed a low cost system to tie-in the field data to its geographic location by creating a software application using **C#** that interfaced with GPS instrument and road data collection equipment.
- Developed a new image capture software using **C#,** Sony Vegas to enable capturing of hi-definition images of pavements from video tapes for integration with pavement network data.
- Introduced concept of using open source alternatives such as Google Earth for cost-constrained clients to display pavement data and integrate with existing pavement management systems.
- Involved in creating project documentation in **SDLC** phase using MS Project, IBM Rational.
- Responsible for maintaining/upgrading existing IMS pavement management software called PavePRO developed in **Visual FoxPro**.

08/2002 to 12/2007 Toledo, OH	**Doctoral Research Assistant** **UNIVERSITY OF TOLEDO**

- Performed extensive research, development and analysis of pavement management information system (PMIS) for the Ohio Department of Transportation (ODOT). Liaised closely with ODOT Office of Pavement

Engineering in gathering user requirements and delivering project updates.

- Developed Pavement Management Information System (PMIS) for **ODOT**. PMIS is a data input, analysis and reporting software in **VB6**, **MS Access**, **DAO**, **ArcGIS** and **MapObjects**.
- Spearheaded development and implementation of Aggregate Geographical Information System (AGIS) for **ODOT** using **C#, ArcGIS, ArcObjects** and Access for use in performing analysis of spatial statistics culled from pavement aggregate data.
- Skillfully analyzed and programmed into PMIS statistical models such as regression, Markov, Kaplan-Meier, Weibull and linear mixed effects.
- Utilized data mining algorithms such as cluster analysis, decision trees and fuzzy logic using **C#** and **Java** to identify existing patterns in ODOT data.

Education

Ph.D., Engineering   2007

UNIVERSITY OF TOLEDO — Toledo, Ohio

Master's degree, Transportation Engineering   2002

JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY — Hyderabad, India
